7 December 2021

Dear Parent/Carer

I am writing to let you know about an additional benefit from the web based learning platform, Complete Mathematics which the maths department is now using.

The Complete Mathematics website has two elements 'Classroom' and 'Tutor' which run parallel to each other, with 'Classroom' being used to deliver and record the materials used in the actual lessons in school and 'Tutor' being used to complement the work in the lesson at home.

The 'Tutor' part of the package is an excellent resource designed by expert teachers and is available for parents to buy should they choose to do so. This element of the package runs alongside their work in school and so there is no expectation from teachers for how much they do in their own time. We have had some very good feedback in school from the students here who are trialling this for us.

For the whole of December the Complete Mathematics 'Tutor' element is accessible, free of charge, for students and parents to trial and see if it can help to support with maths outside of school. Both parts are accessed using the same username and password issued to students earlier in the term. The site and further information can be viewed at <https://completemaths.com/>

In January you will be given the option to 'purchase' a subscription to the 'Tutor' package, which costs £1 per week, but there is **no obligation** to do so.

If you have any questions, please do not hesitate to contact me.

Kind regards

L Irons
